

Java Learning Center

No.1 In Java Training & placement

Steps to use Tiles Framework:

Ex 1:

- 1) Identify the Layout required.

Java Learning Center
Welcome to JLC
All Rights Reserved

- 2) Design the Layout JSP which is a centralized JSP.

JLCLayout.jsp

```
<%@ taglib uri="http://tiles.apache.org/tags-tiles" prefix="tiles" %>
<html> <body>
<table width="90%" height="90%">
  <tr height="10%">
    <td align="center">
      <tiles:insertAttribute name="HEADER"/>
    </td>
  </tr>
  <tr height="80%">
    <td align="center">
      <tiles:insertAttribute name="BODY"/>
    </td>
  </tr>
  <tr height="10%">
    <td align="center">
      <tiles:insertAttribute name="FOOTER"/>
    </td>
  </tr>
</table> </body> </html>
```

- 3) Develop the content JSP.

header.jsp footer.jsp welcome.jsp
