

Java Learning Center

No. 1 In Java Training & placement

```
</td>
<td width="70%" align="center">
    <tiles:insertAttribute name="BODY"/>
</td>
</tr>
<tr height="10%">
    <td colspan="2" align="center">
        <tiles:insertAttribute name="FOOTER"/>
    </td>
</tr>
</table> </body> </html>
```

3) Develop the content JSP.

header.jsp footer.jsp lmenu.jsp welcome.jsp

4) Write the required tiles definition in tiles.xml file.

```
<tiles-definitions>
<definition name="HomeDef" template="/JLCLayout.jsp">
    <put-attribute name="HEADER" value="header.jsp"/>
    <put-attribute name="LMENU" value="lmenu.jsp"/>
    <put-attribute name="BODY" value="welcome.jsp"/>
    <put-attribute name="FOOTER" value="footer.jsp"/>
</definition>
</tiles-definitions>
```

5) Include the tiles definitions in the required JSPs.

home.jsp

```
<%@ taglib uri="http://tiles.apache.org/tags-tiles" prefix="tiles" %>
<tiles:insertDefinition name="HomeDef"/>
```
